

C-169 Nan-A-Bah Indian Allotment

Date: December 1952

Engineer: P. W. Simmons

Only NE $\frac{1}{4}$ of NE $\frac{1}{4}$ contains Todilto.

Allotment under lease to Glen D. Williams, Gallup, New Mexico.

Williams started as partner with Sitton. Sitton had visions of huge tonnage - shovel operation; would not hold still for the clean mining necessary. Williams agreed to pay the \$16,000 Sitton was out in developing the property, so Sitton bowed out.

There are three pits at present with drill data indicating that mineralization is consistent over about 10 acres.

The grade of ore runs consistently above .20%.

Williams now has \$35,000 wrapped up in equipment, a TD-19 being the largest single unit.

Plans call for continuous drilling on this and several other leases now held by Williams.

Rate of production, at least 500 tons per month with a good chance of averaging 750.

January 1953

Engineer: T. Toren

The Todilto Bench has been intensively wagon-drilled and a stripping program started. Development drilling is being continued. This mine produced about 500 tons of plus 0.20% ore during December, 1952. The ore is hand sorted by Navajos. Nine men are employed on the property.

Not operating. No evidence of recent mining. The only equipment noted on the property was a ripper and compressor. Extensive open pit workings 15 to 20 feet deep are more than adequate to account for the amount of ore indicated on past bonus applications. No irregularities noted with respect to bonus payments.

ABSTRACT

The property is a quarter section leased from an Indian allottee. It is not on lands withdrawn by the Atomic Energy Commission. No evidence of any conflict was found. No ore was sold prior to February 26, 1952.

The property is recommended for certification.

INTRODUCTION

The application for certification was received from Glenn D. Williams, 818 South Puerto, Gallup, New Mexico on August 21, 1952.

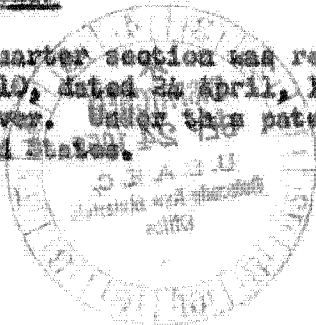

The property was examined on August 13, 1952 in the presence of Mr. Williams. The original application was from F. A. Sifton, the work contractor.

STATUS OF THE LAND

The property is leased from an Indian allottee for mining purposes, and consists of a quarter section containing 160 acres. There are no ABC Withdrawals in this district. The lease is for the NE/4 of Section 24, T13N, R11W in Grants Mining District, McKinley County, New Mexico. The property can be reached by going west of Highway 66 from the Bluewater Buying Station for 8.2 miles; thence turn right, follow a gravel road for 4.5 miles; thence north 0.6 miles; thence west 0.6 miles which is the mine. The quarter section can be located from the NE section corner, which exists in the field.

GENERAL NOTE

The quarter section was removed from public domain under Patent No. 1036610, dated 24 April, 1936 from the U. S. Government to Man-a-bah Vandever. Under this patent the mineral rights are not reserved to the United States.

PRODUCTION

The Colorado New Materials Office Finance Branch records concur with the applicant that there was no production during the critical period. If certified the property would be eligible for bonus payments on 10,000 pounds of U₃O₈.

RECOMMENDATION

It is recommended that the Man-a-bah Vandever Lease be certified for bonus payments.

PRODUCTION POSSIBILITIES

The mine is on a Todilto Bench, just south of Haystack Mountain. The property was explored by wagon drill and a sizeable ore body blocked out.

Charles A. Rasor

September 9, 1952

An area roughly 300 by 700 feet has been stripped of sand and barren limestone. About 5 tons of hand-sorted ore is produced in a shift by five miners. The lessee stated that he planned on putting on a second shift. The property should be a substantial producer.
